UVGI MOBILE TOWER

Surface-Safe™ Technology

Dimensions (per unit): 60"H x 20"W x 20"D
Power (per unit): 120V. 15 Amp.

Eight (8) High-Intensity UVC Germicidal Lamps

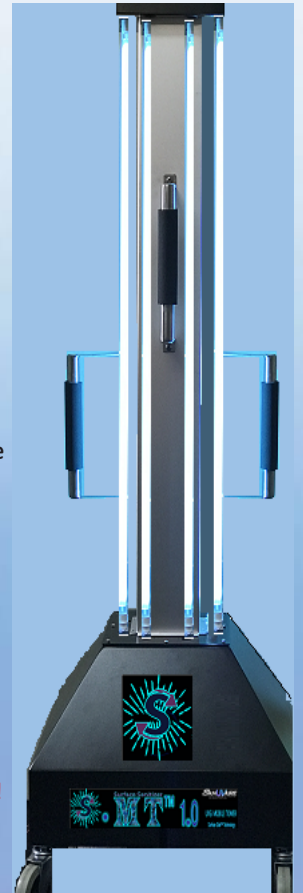

Easy to maneuver handles at different heights. Total Four (4).

- Each unit has the following features:
 - One (1) illuminated push-type Switch
 - One (1) Timer Switch (60 mins.)
 - One (1) Selector Switch
 - Independent power protection per lamp.
 - Remote Control

UVC germicidal light is effective at disrupting the cellular membrane of the microorganism causing irreparable damage to the DNA resulting in the sterilization of the microorganism.

Traditional disinfection systems are effective but require multiple positioning within a space to lessen the chances of "shadow area" which block the sterilizing ability of the UVC light. In doing so, time and resources are spent repositioning the system around and in some cases preparing the area for additional treatment.

NOT needed with the S-MT System!

Minutes to 99.9999 disinfection for Clostridium difficile in a 12' x 12' Area

SanUVAire Surface-Safe™ S-MT 1.0
Mobile UV Disinfection Tower disinfect the area in 10 minutes.

- 20 Ft Retractable power-cord
- Four (4) 4" caster wheels w / lock

Tested to show >99.9999% reduction of Clostridium difficile, VRE & MRSA

No need to reposition to while sanitizing the whole area

Irradiate Hospital Patient Rooms, Bathrooms & ORs

Disinfect High-Touch Areas that may lead to HAI
